

Dashboard Storyboard

EduVision – Higher Education Performance Dashboard

Module	Module 4 – Dashboard Planning & Prototyping
Project	Springboard Internship Project
Prepared By	Ishita Tiwari

Storyboard Overview

This document presents the planned dashboard structure for the EduVision Higher Education Performance Dashboard before Tableau development begins. It serves as a wireframe-level blueprint that defines how the final dashboard suite will look, behave and connect together.

The storyboard defines the following elements for each dashboard:

- Dashboard layout
- KPI placement
- Filters
- Navigation
- Dashboard interactions
- Visual hierarchy

The dashboard suite consists of four connected dashboards, linked through a consistent navigation flow:

University Overview

Research Analytics

Student Analytics

Country Comparison

University Overview

Provides an executive-level summary of global university performance, acting as the entry point into the dashboard suite.

Research Analytics

Presents a detailed breakdown of research performance, including publications, citations and research productivity.

Student Analytics

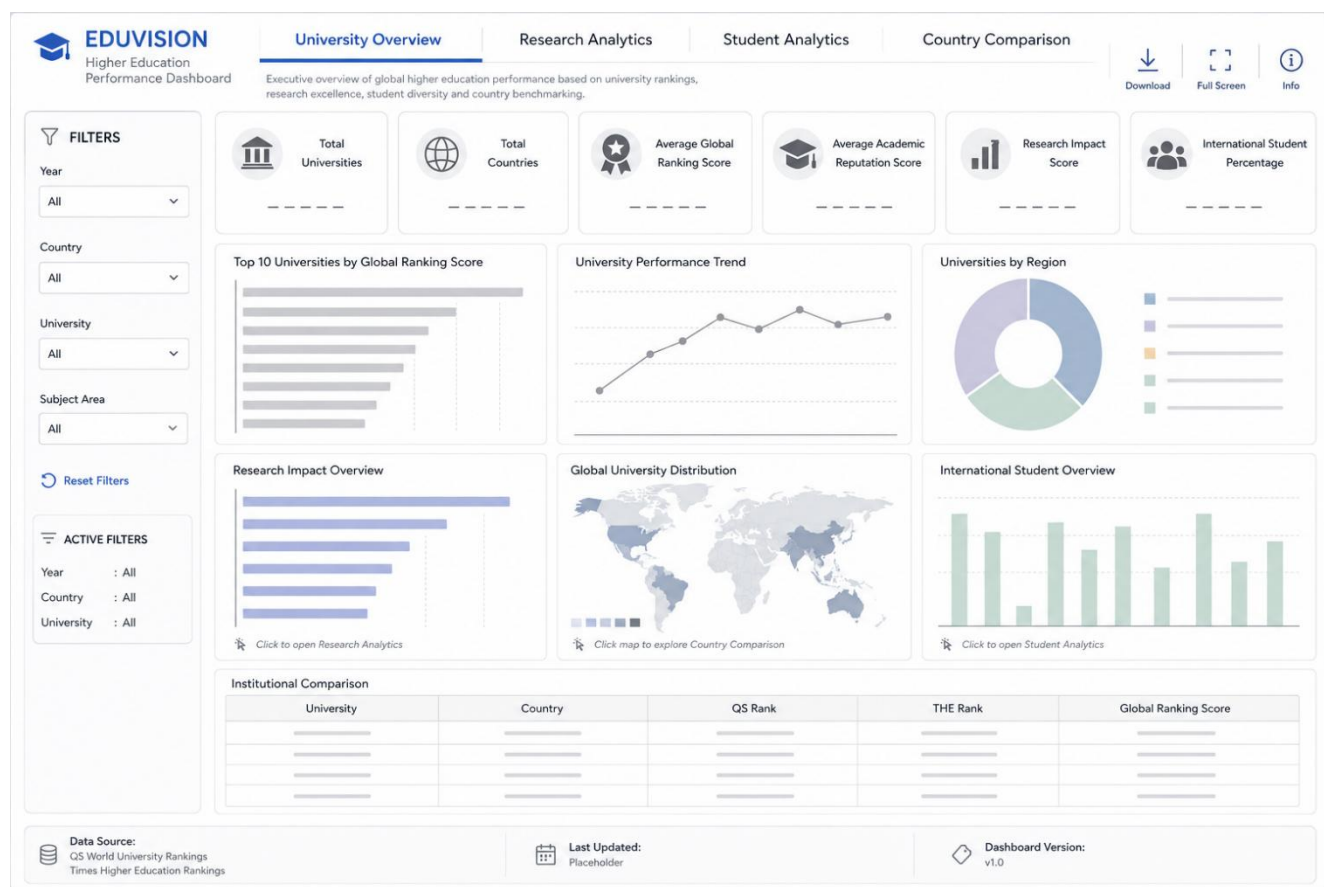

Focuses on student demographics, internationalization and faculty-related performance metrics.

Country Comparison

Compares higher education performance across countries using economic and enrolment indicators.

All four dashboards follow a consistent layout, a shared navigation system, a common filter panel and the same visual design language, ensuring a unified user experience across the analytics suite.

Dashboard 1 – University Overview

Objective

This dashboard serves as the executive overview of the entire analytics system, giving decision-makers a single-glance summary of global university performance.

Filters

- Year
- Country
- University
- Subject Area

Key Performance Indicators

- Total Universities
- Total Countries
- Average Global Ranking Score
- Average Academic Reputation Score
- Research Impact Score
- International Student Percentage

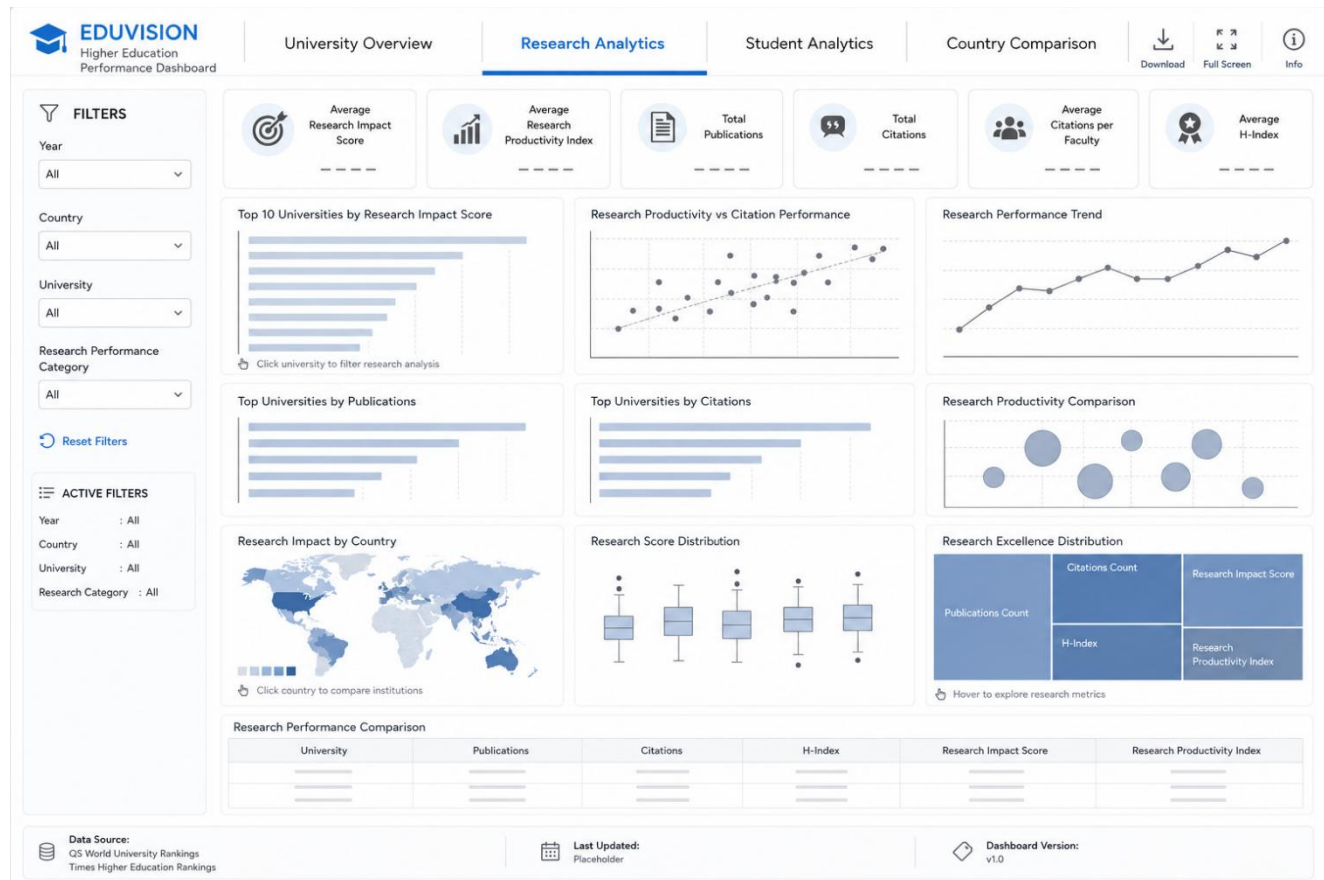

Main Visualizations

- Top 10 Universities by Global Ranking Score
- University Performance Trend
- Universities by Region
- Research Impact Overview
- Global University Distribution
- International Student Overview
- Institutional Comparison Table

Planned Dashboard Actions

- Click Research Impact Overview → Research Analytics
- Click Global University Distribution → Country Comparison
- Click International Student Overview → Student Analytics

Dashboard 2 – Research Analytics

Objective

This dashboard provides a detailed analysis of research performance across universities, supporting deeper investigation beyond the executive overview.

Filters

- Year
- Country
- University
- Research Performance Category

KPIs

- Average Research Impact Score
- Average Research Productivity Index
- Total Publications
- Total Citations
- Average Citations per Faculty
- Average H-Index

Main Visualizations

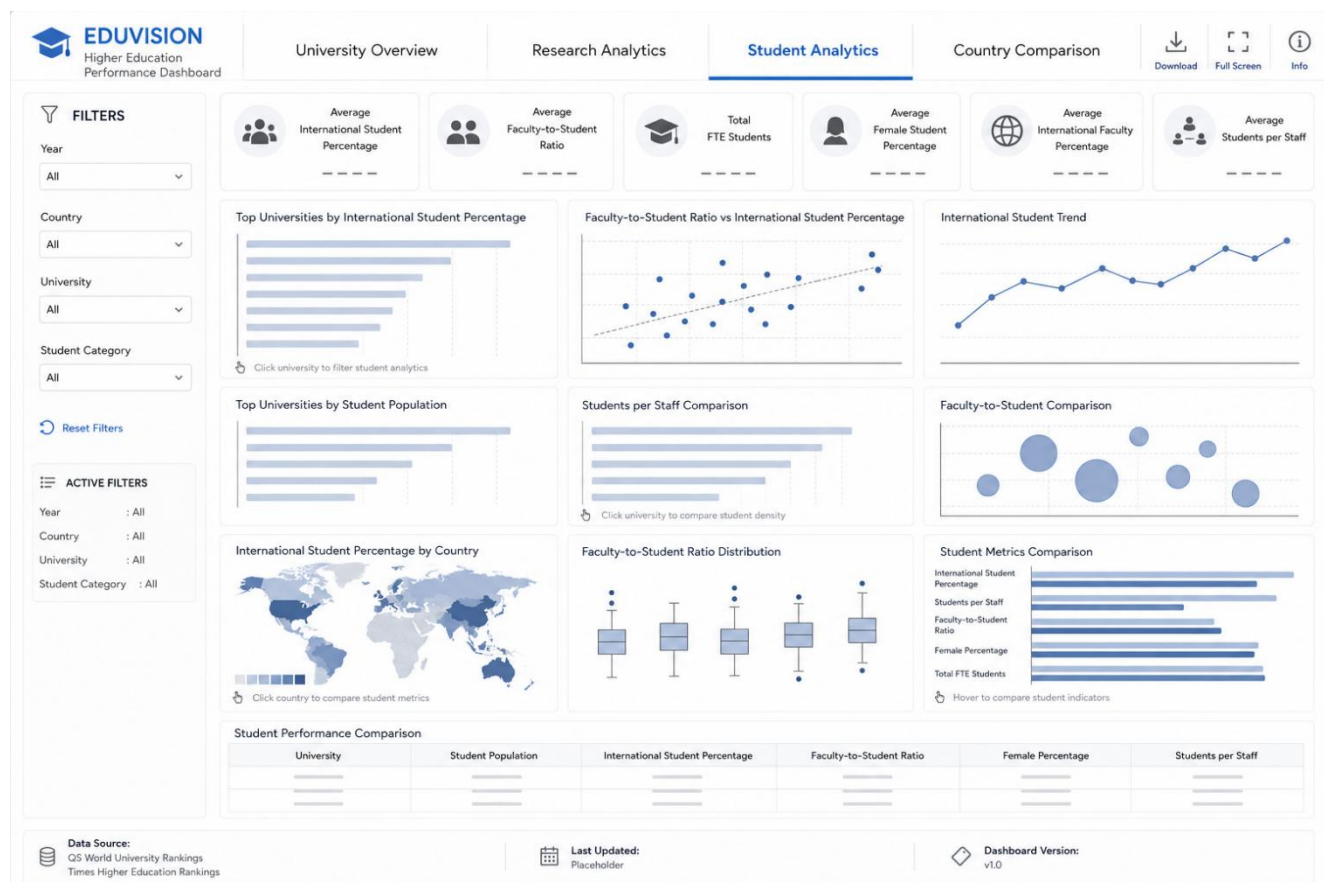

- Top Universities by Research Impact Score
- Research Productivity vs Citation Performance

- Research Performance Trend
- Top Universities by Publications
- Top Universities by Citations
- Research Productivity Comparison
- Research Impact by Country (Filled Map)
- Research Score Distribution
- Research Excellence Distribution (Treemap)
- Research Performance Comparison Table

Planned Dashboard Actions

- Click University to filter research analysis
- Click Country on Map to compare institutions
- Hover over Treemap to explore research metrics

Dashboard 3 – Student Analytics

Objective

This dashboard focuses on student demographics, internationalization and faculty-related metrics across universities.

Filters

- Year
- Country
- University
- Student Category

KPIs

- Average International Student Percentage
- Average Faculty-to-Student Ratio

- Total FTE Students
- Average Female Student Percentage
- Average International Faculty Percentage
- Average Students per Staff

Main Visualizations

- Top Universities by International Student Percentage
- Faculty-to-Student Ratio vs International Student Percentage
- International Student Trend
- Top Universities by Student Population
- Students per Staff Comparison
- Faculty-to-Student Comparison
- International Student Percentage by Country
- Faculty-to-Student Ratio Distribution
- Student Metrics Comparison
- Student Performance Comparison Table

Planned Dashboard Actions

- Click University to filter student analysis
- Click Country to compare student metrics
- Hover over Student Metrics Comparison for additional insights

Dashboard 4 – Country Comparison

Objective

This dashboard compares higher education performance across countries, supporting cross-country benchmarking.

Filters

- Year
- Region
- Country
- Development Category

Featured Card

- Featured Country
- Best University Rank

KPIs

- Total Countries
- Average Country Ranking Score
- Average GDP per Capita
- Average Education Expenditure
- Average Tertiary Enrollment Rate

Main Visualizations

- Top Countries by Average University Ranking
- GDP per Capita vs Average Ranking Score
- Country Performance Trend
- Global Higher Education Performance Map
- Education Expenditure Comparison
- Country Benchmark Comparison
- Regional Higher Education Performance
- Country Ranking Distribution
- Country Performance Metrics Comparison
- Country Benchmark Comparison Table

Planned Dashboard Actions

- Click Country to filter benchmarking
- Click World Map to compare education performance
- Hover over comparison chart to explore country metrics

Navigation, Filters and Planned Interactions

All four dashboards in the EduVision suite share a common navigation and interaction model, ensuring the analytics experience feels unified as users move between University Overview, Research Analytics, Student Analytics and Country Comparison.

Every dashboard includes the following shared elements:

- Consistent navigation bar
- Common filter panel
- Active filter summary
- Dashboard action icons
- Click-to-filter interactions
- Cross-dashboard navigation
- Hover tooltips
- Interactive comparisons
