

EDUVISION 2.0

DASHBOARD STORYBOARDS

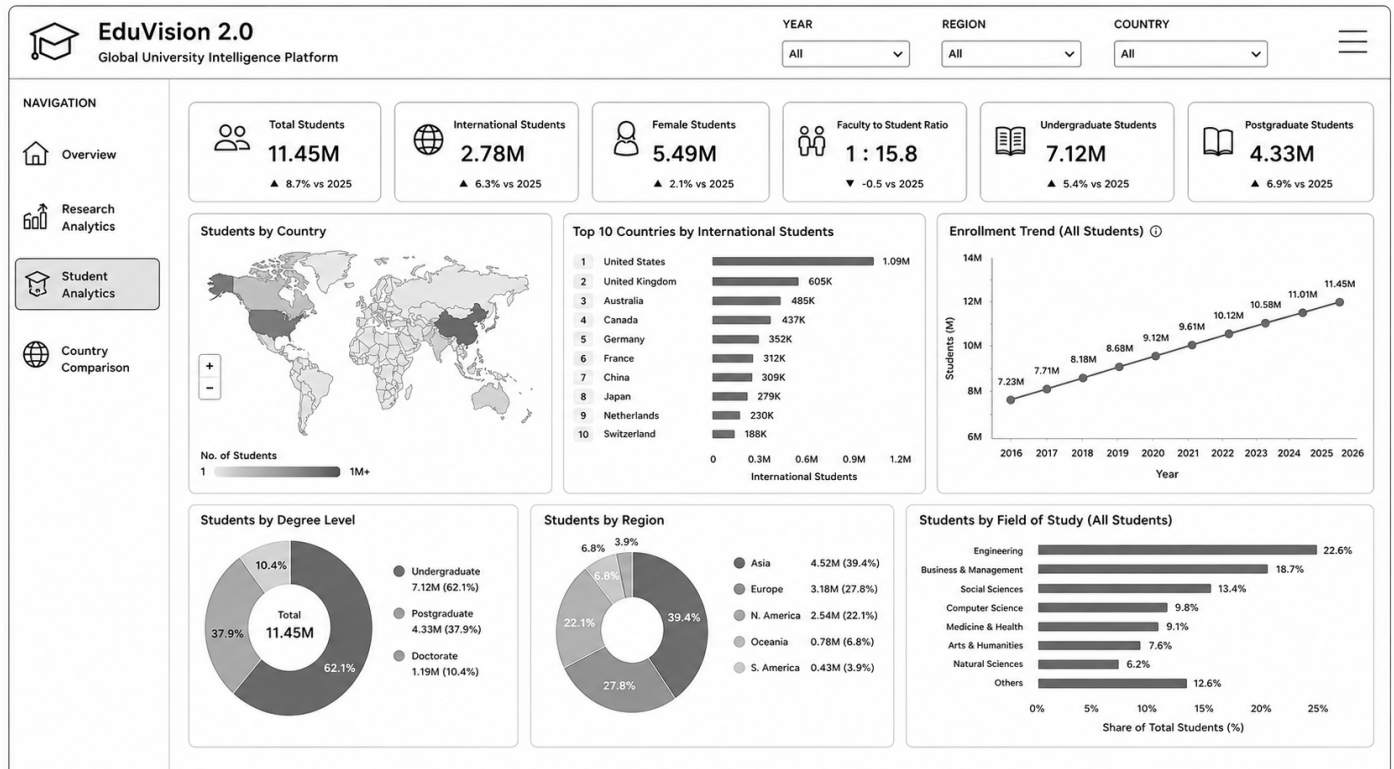

STORYBOARD 1: University Overview

What this dashboard tells the viewer:

- KPI cards summarize the overall university landscape (universities, ranking, overall score, international students, faculty ratio and research output).
- World map and Top-10 charts highlight geographical distribution and leading universities/countries.
- Trend and comparison charts reveal performance changes over time.
- Global filters (Year, Region, Country) update every visualization.

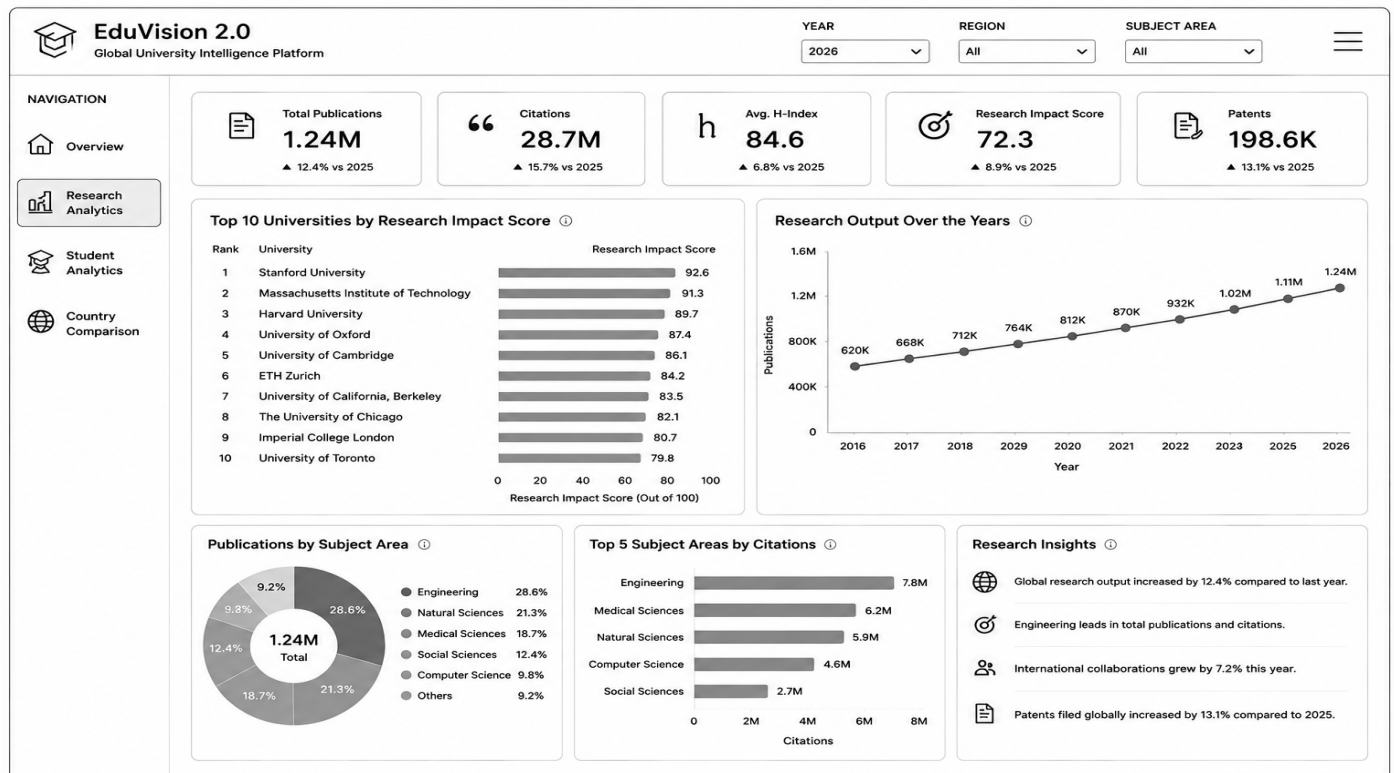

STORYBOARD 2: Research Analytics

What this dashboard tells the viewer:

- KPIs summarize publications, citations, H-index, research impact and patents.
- Research leaders, yearly research growth and subject-wise distribution are displayed.
- Charts identify the most influential research domains and institutions.
- Global filters (Year, Region, Subject Area) control the dashboard.

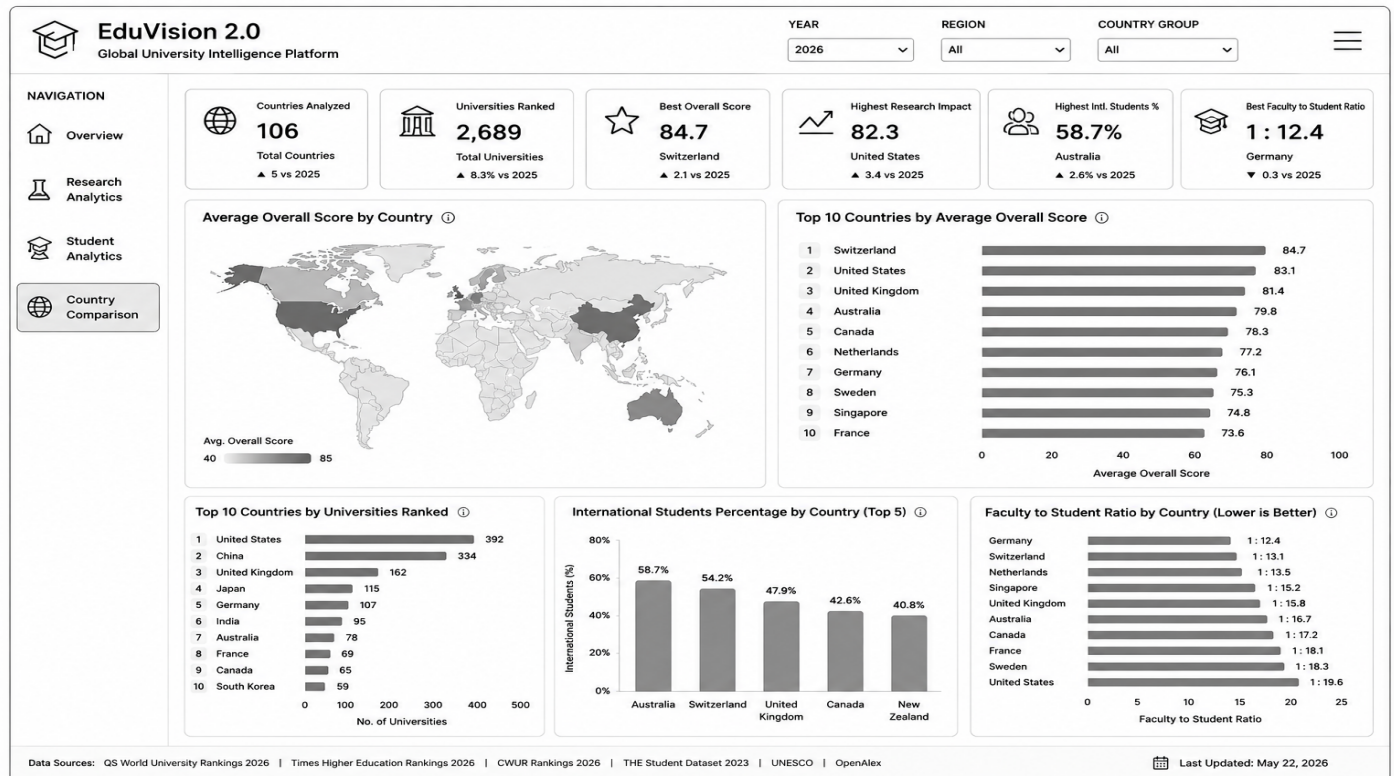

STORYBOARD 3: Student Analytics

What this dashboard tells the viewer:

- KPIs summarize enrollment, international students, gender split and degree levels.
- Maps, trend charts and donut charts explain student demographics.
- Top countries and field-of-study charts provide comparative insights.
- Global filters (Year, Region, Country) apply across all visuals.

STORYBOARD 4: Country Comparison

What this dashboard tells the viewer:

- KPIs compare countries on universities, rank, score, international students, faculty ratio and research output.
- Maps, scatter plot, trends and Top-10 visuals support country-level comparison.
- Regional distribution and institutional comparison help identify strengths.
- Global filters (Year, Region, Country) enable interactive analysis.
