DASHBOARD STORYBOARDS

STORYBOARD 1: University Overview

What this dashboard tells the viewer:

- KPI cards provide a quick summary of university performance across key metrics such as overall score, QS score, THE score, research impact, and international student percentage.
- Interactive filters allow users to analyze universities by country, region, university, and university type.
- Bar, pie, line, scatter, and map visualizations help identify top-performing universities, regional trends, student population distribution, and global university locations.
- The dashboard enables users to compare performance across regions and discover insights through an interactive, executive-style overview.
